Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales places all through Canada and the U.S. The forklift product line remarkably features 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous vehicle models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American market, due to its outstanding level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division located in Cleveland has a professional team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the domestic forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a home-based equipment expansion venture. Sales of these products were originally targeted to state-run firms, large scale corporations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a position of substantial expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling market. This joint-venture proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales system and started exporting designs they had established through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
